

# Haiku / Canto App Setup

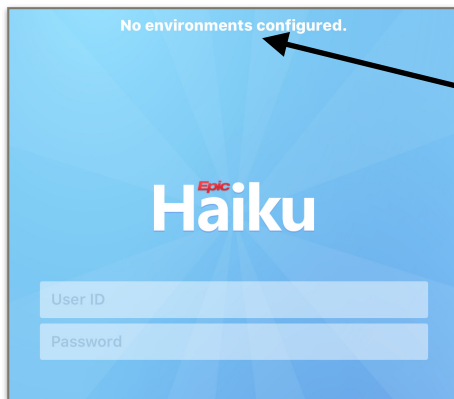

On a Health System, MobileIron registered device, follow these instructions after connecting to the WiFi network **hscs-wireless**

**Health IT Apps** is the Health System internal app store. This is the place you will find special apps recommended by UVa Health System. Most apps in this store can be downloaded without an Apple ID being used. This store can be accessed from any internet connection inside or outside the Health System.

Find and open **Health IT Apps** on your device. The first time the app opens you will need to accept a certificate to continue.

Find and download the app and configuration files you need from **Health IT Apps**.

Start by opening the Haiku or Canto app. If you see **No Environment Configured**. Go back to the Home screen and open the **Haiku Setup** app. Return to **Health IT Apps** to download this configuration file if needed.

This setup app will ask for permission to open the Haiku or Canto app. Tap **Open** to continue.

Open in "Haiku"?

Cancel **Open**

## PRD Environment

The Epic app should now be populated with the **PRD Environment**.

If you do not see PRD then in the device Settings App under WiFi, double check that you have selected **hscs-wireless** as your WiFi network.

If you are the sole user of this device and you have TouchID or FaceID enabled, feel free to use this feature to access your Epic app. Choose yes when logging in.
